# PureSpa™ with Fiber-Tech™ Technology

DESIGNED FOR COMFORT. ENGINEERED FOR DURABILITY.

Introducing Fiber-Tech™ Technology, designed to offer superior structural stability while maintaining a comfortable surface for a luxurious and refreshing spa experience.

Industry standard spa interior has been enhanced with lightweight, high-strength fibers for amazing durability and comfort.

U.S. Patent No. 8,562,773

Conventional Inflatable Spa

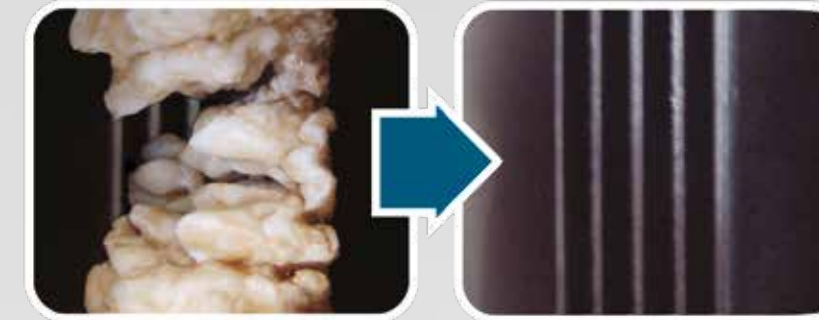

PureSpa™ by INTEX®

Fiber-Tech™ Technology provides the ultimate comfort and support.

## Hard Water Treatment System

Built-in Hard Water Treatment System makes water gentler on skin, clothes and the entire spa system.

Hard water build up limits water flow and reduces the life of your spa.

The system generates an electro-magnetic field that agitates calcium and other minerals in the water causing them to create suspended crystals.

The suspended crystals of hard water elements are retained in the filter cartridge leaving soft water in the spa.

## Powerful and Safe Heating System

The Positive Temperature Coefficient (PTC) heater is designed to maximize heat transfer to the water, while ensuring the highest level of safety, performance and longevity.

## Durable Exterior

Puncture-resistant 3-ply laminated material

## 3 Advantages of an INTEX PureSpa™

1 Durable Fiber Tech Technology

2 The only inflatable spa with built in Hard Water Treatment system

3 Heated air bubble technology

Relaxation is a Touch of a Button Away
